

01 Monthly volume has source-specific gaps and clusters

Independent parent/Work counts; colour is scaled to each row's own 95th percentile, so rows are not directly comparable.

Pale = low within that source frame · dark = high · white = outside observed dated span

Examples: 1999/2000 September Commons recesses; 2013 April DEFRA policy-series cluster; sparse 1994 US selected metadata.

Study publication interval: 1988-01-01-2026-09-21. September 2026 is partial. Zero means zero in the defined source frame.

Source data: monthly_source_genre_counts.csv. Source checkpoints differ; this chart does not infer an event or cross-source rate.
